Brand OS v1

A New OS for IP.

Practical guidelines for clear, consistent IPX communications.

Use the real logo.	Keep the supplied artwork's shape, proportions and colours.
Make one point.	One clear headline. One useful proof. One next step.
Give colour a job.	Black grounds the work. White carries the message. Orange signals emphasis and action.
Show the work.	Use relevant product screens and real creative. Label simulated screens "DEMO · SIMULATED".
Keep it readable.	Give text and artwork room. Preserve any disclosures that belong to an asset.

Intellectual Property Exchange, Inc.
Version 1.0 · October 2026

Logo & stroke

Use the supplied logo. Never redraw the X.

Primary logo
White IP + ember X on black.

One colour
Use a supplied mono version when colour is unavailable.

Small spaces
Use the X icon when the full logo is too small.

Give it room

- Leave at least three times the IP line thickness around the logo.
- Full logo: at least 33 px high on screen.
- X icon: at least 20 px high on screen.

Keep it intact

- Don’t stretch, rotate or recolour the artwork.
- Don’t add shadows or effects to the logo.
- Don’t draw a stroke through the logo, names, links or legal copy.

Use the stroke with a purpose

Cross out the old way

Strike through a problem or outdated process. Use no more than three lines; keep the words readable.

Underline the benefit

Emphasise one short phrase, such as “One OS.” Use one underline per frame.

Connect the story

Use one continuous path across a composition or carousel. Match it at each slide edge.

For print, keep the IP letters at least 8 mm high. Use the supplied black logo on light backgrounds. Check contrast and fine lines at the final output size.

Colour

Black, white and IPX orange form the core palette.

Black

`#000000`

Primary digital background.

White

`#FFFFFF`

Headlines and primary text.

IPX orange

`#F5793B`

Solid accents, focus and action.

Orange scale

Use lighter steps on dark surfaces and darker steps on light surfaces. Check the final text/background pairing.

50	100	200	300	400	500	600	700	800	900
`#FFF8F3`	`#FFEEE0`	`#FFD9BD`	`#FFC199`	`#FA9D6D`	`#F5793B`	`#E6592A`	`#C4461F`	`#9E3617`	`#7D2A12`

For clear actions

Use black text on solid IPX orange. Use white or light grey for body copy on black. Keep large coloured fields away from long passages.

For accessible reading

Text needs at least 4.5:1 contrast; large text needs 3:1. Keep essential labels off multicolour gradients unless every part of the pairing passes.

Preserve the signature stroke

The supplied logo and brush artwork retain their red-to-amber gradient, `#EF4136 → #FBB040`. Use those files as supplied. Use the core palette for new layouts around them.

Brand family

Keep the IPX foundation. Give each brand its established accent.

CultureX

`#FB7185 → #EC4899`

LIVEX

`#FB923C → #F59E0B`

CreatorX

`#A78BFA → #6366F1`

BrandX

`#22D3EE → #0EA5E9`

PODX

`#34D399 → #14B8A6`

IPX Studios

`#FACC15 → #F97316`

Use the right colour at the right level

These are the public ecosystem accents. Keep the brand name visible; colour alone must never identify a brand. In product screenshots, retain each desk's own interface colours.

Core web accents

IPX web actions use `#F97316 → #EF4444 → #EC4899`. The light highlight palette is `#FDBA74 → #F472B6 → #FDE047`. Use accents sparingly; keep supporting copy solid and readable.

Typography

Use the platform’s system sans-serif. Make hierarchy through size, weight and space.

A New OS for IP

Clear language. Strong headings. Room to read.

The IPX digital system uses the native sans-serif on each device. Use regular 400 for body copy, 600 for labels, 700 for supporting headings and 900 for major display headlines.

```
ui-sans-serif,system-ui,sans-serif,"Apple Color Emoji","Segoe UI Emoji","Segoe UI Symbol","Noto Color Emoji"
```

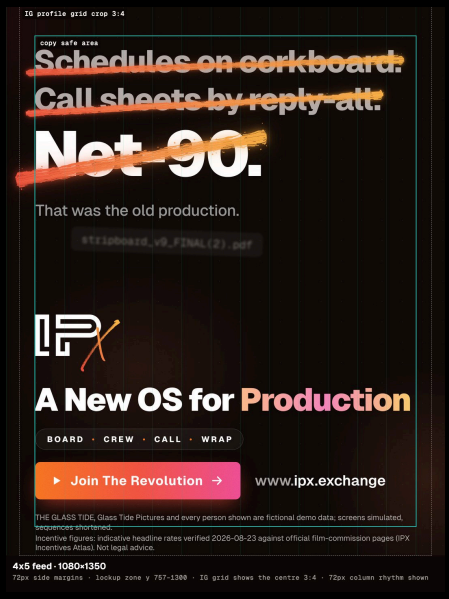

Role	Size	Weight & spacing
Web hero	56–192 px, fluid	900 · line height 0.82 · tracking −0.045em
Web section heading	40–88 px, fluid	900 · line height 0.95 · tracking −0.04em
Supporting copy	16–20 px	300–400 · line height 1.625
Card title / body	18 px / 14 px	700 / 400 · body line height 1.625

These are digital reference sizes. Scale print and campaign copy for the viewing distance. Use at least 16 px for web reading text, keep paragraphs within 45–75 characters, and preserve browser zoom. Use system monospace only for code and measurements.

Keep lettering in supplied campaign artwork intact. The system stack is the standard for new editable type; it does not identify the font embedded in an image.

Layout

Lead with the message. Follow with proof. Finish with a clear next step.

Feed layout: 72 px side margins on a 1080 px canvas.

Campaign layouts

Use one headline, one useful screen or example, and one clear action. Reserve space for the logo and required legal copy.

- **1080 × 1350 feed:** 72 px side margins.
- **1080 × 1920 story:** essential copy between y = 240 and 1500; keep platform controls clear.
- **1920 × 1080:** message left, product screens right.

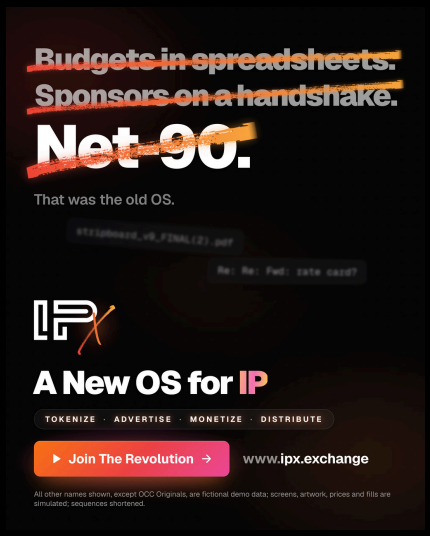

Digital layout

Setting	Value
Breakpoints	640 / 768 / 1024 / 1280 / 1536 px
Spacing & gutters	4 px spacing base. Homepage side gutters: 24 px. Founding 50, About and public desk pages: 16 px.
Content width	Homepage hero: max 1280 px. Sections: max 1152 px.
Cards	16 px radius; 24–28 px padding. Inventory cards: 24 px radius and 32 px padding.

Adapt the grid to the content and device. Keep the logo, message, next step and disclosures inside the safe area. On mobile, stack content in reading order and keep controls at least 44 × 44 px.

Examples

Choose the format that makes your point fastest.

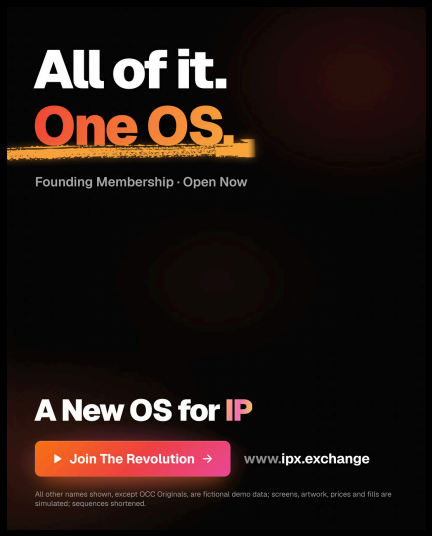

Show the problem

Use a strike ad for a familiar frustration. Keep the hook short and the benefit clear.

Show the product

Use a desk card to explain one part of IPX. Name the desk, then show what it does.

Close with one idea

Use a simple end card to bring the story together. Leave the viewer with one next step.

Product imagery

- Use the product screen as the main image.
- Keep the desk label and “DEMO · SIMULATED” readable.
- Use supplied fictional demo names and data.
- Avoid stock portraits and recognisable Apple hardware.

Motion

- Reveal the headline, then draw the stroke.
- Let each message read before the next one.
- Keep the end card on screen long enough to read.
- Respect reduced-motion preferences on the web.

Supplied campaign artwork is shown unchanged as a visual example. Use current product details and asset-specific disclosures when preparing new communications.

Voice & names

Confident, concrete and easy to understand.

Company name
Intellectual Property Exchange, Inc.

Brand name
IPX

Core line
A New OS for IP.

Simple invitation
Explore IPX.

Write for the task

- Start with a familiar need: a shoot, a brief, a booking or a project.
- Explain one benefit with one concrete example.
- Use verbs that tell people what happens next: explore, view, read or contact.
- Use the full company name in formal attribution. Use IPX in everyday copy.

Make the proof match the words

Describe features and access as they exist for the audience receiving the message. Be precise about rights, fees, payments and eligibility. Keep demos labelled and distinguish examples from customer results.

Too vague
“Unlock a revolutionary creative ecosystem.”

Clearer
“Find the desk for your work.”

Before sharing

- [ ] Check names, dates, links and product details.
- [ ] Keep required disclosures readable and attached to the relevant claim.
- [ ] Never promise guaranteed income, returns, rights or outcomes.
- [ ] Use one clear next step that is available to the recipient.

Audience: filmmakers & crew

Start with the person’s goal. Answer the barrier with useful proof.

Fictional audience archetypes for communication planning. Names describe representative needs, not individual customers or research findings.

Maya

The Unfunded Auteur
Writer-director developing a first feature.

Goal	Make the film while protecting her rights.
Barrier	Gatekeepers, complex entries and uncertain terms.
Proof to show	Plain-language rules, rights terms and a clear project walkthrough.
Relevant area	Production / Studio

Dez

The Producer-Operator
Independent or line producer managing a shoot.

Goal	Move the project forward with traceable decisions and costs.
Barrier	Scattered budgets, call sheets and team adoption.
Proof to show	One complete workflow, with roles and approvals explained.
Relevant area	Production

Rico

The Day-Rate Pro
Gaffer, editor or colourist working project to project.

Goal	Get booked, credited and paid on agreed terms.
Barrier	Chasing invoices and uncertainty about AI and payment control.
Proof to show	Clear booking terms, human approval and visible work status.
Relevant area	Crew

Choose the message for the person and the moment. Make any offer, feature or next step specific to what is available.

Audience: talent, creators & fans

Start with the person’s goal. Answer the barrier with useful proof.

Fictional audience archetypes for communication planning. Names describe representative needs, not individual customers or research findings.

Jules

The Breakout Talent
Performer with a growing following, supported by a manager.

Goal	Control her image, deals and revenue splits.
Barrier	Deals in DMs and uncertainty about who sees the numbers.
Proof to show	Explain access permissions, representation and contract terms.
Relevant area	Talent

Kai

The Creator-Entrepreneur
Creator building a business around an audience.

Goal	Own the audience relationship and build lasting IP.
Barrier	Platform cuts, scattered briefs and invoice chasing.
Proof to show	A relevant brief, clear commercial terms and a delivery workflow.
Relevant area	Creator

Nia

The Superfan
Culture follower who values access, credit and connection.

Goal	Be close to the work and recognised for supporting it.
Barrier	Unclear membership value and unfamiliar crypto language.
Proof to show	Explain access, perks, limits and risks in plain language.
Relevant area	Membership

Choose the message for the person and the moment. Make any offer, feature or next step specific to what is available.

Audience: brands & partners

Start with the person’s goal. Answer the barrier with useful proof.

Fictional audience archetypes for communication planning. Names describe representative needs, not individual customers or research findings.

Priya

The Partnerships Lead
Brand marketer accountable for campaign outcomes.

Goal	Choose work she can defend to the business.
Barrier	Unverifiable reach and disputed deliverables or invoices.
Proof to show	Relevant work, defined deliverables and credible reporting.
Relevant area	Brand / sponsorship

Theo

The Boutique Agency Principal
Owner of a small talent, creative or management agency.

Goal	Coordinate the agency’s clients and work in one place.
Barrier	Migration effort, scattered tools and client-data concerns.
Proof to show	A scoped walkthrough, an import plan and clear data terms.
Relevant area	Agency

Elena

The Rights-Holder
Festival producer or catalogue owner.

Goal	Create year-round value from her IP and audience.
Barrier	One-off distribution deals and limited ongoing reach.
Proof to show	Relevant partner examples, rights scope and a clear programming plan.
Relevant area	IPX Studios / LIVEX

Choose the message for the person and the moment. Make any offer, feature or next step specific to what is available.

Parallel journeys

Filmmakers & crew

Read across to compare the same stage. These are communication paths; use only the features and destinations available to the audience.

Maya	Dez	Rico
1. Recognize		
Name the frustration of getting a film made.	Show the cost of scattered call sheets.	Recognise job-search and invoice friction.
2. Reframe		
Connect the film to the people and work it needs.	Connect the team around one workflow.	Connect booking, paperwork and status.
3. Find Your Desk		
Introduce Production and Studio.	Introduce Production.	Introduce Crew.
4. Believe		
Explain the process and rights terms.	Walk through a shoot and its approvals.	Show human control and clear terms.
5. Join		
Show the relevant project or entry route.	Explain the account or walkthrough route.	Explain the crew-profile route.
6. Activate		
Guide one project setup step.	Start with one project or crew call.	Add credits, role and rate information.
7. Amplify		
Invite her to share the work or story.	Invite collaboration or mentoring.	Invite a craft story or referral.

One audience, one stage, one message, one useful proof, one clear next step.

Parallel journeys

Talent, creators & fans

Read across to compare the same stage. These are communication paths; use only the features and destinations available to the audience.

Jules	Kai	Nia
1. Recognize		
Recognise deals scattered across DMs.	Recognise scattered briefs and rate cards.	Recognise the wish to be closer to the work.
2. Reframe		
Connect talent and representation.	Connect the creator's work and business.	Introduce the creator and project story.
3. Find Your Desk		
Introduce Talent.	Introduce Creator.	Explain the membership or project area.
4. Believe		
Explain who can see and act on information.	Explain the brief, terms and delivery.	Answer access, cost and risk questions.
5. Join		
Show the talent or agency route.	Show the relevant creator application.	Explain the available account options.
6. Activate		
Start with a profile or roster.	Guide the first brief or project step.	Help her follow one relevant project.
7. Amplify		
Share relevant work and casting interests.	Invite a disclosed creator story.	Invite her to share the story with friends.

One audience, one stage, one message, one useful proof, one clear next step.

Parallel journeys

Brands & partners

Read across to compare the same stage. These are communication paths; use only the features and destinations available to the audience.

Priya	Theo	Elena
1. Recognize		
Name the problem of unverifiable proof.	Recognise too many tools per client.	Recognise the limits of a one-off event.
2. Reframe		
Connect the brief, work and reporting.	Connect the agency's roster and work.	Connect programming and distribution.
3. Find Your Desk		
Introduce brand and sponsorship routes.	Introduce Agency.	Introduce IPX Studios and LIVEX.
4. Believe		
Walk through deliverables and terms.	Show permissions, records and an import plan.	Show relevant partner work and rights scope.
5. Join		
Offer a relevant contact or walkthrough.	Offer a scoped agency walkthrough.	Start a partnership conversation.
6. Activate		
Start with one clear brief.	Bring one client or roster into the plan.	Define one programming or project step.
7. Amplify		
Invite a supported campaign case study.	Invite a relevant introduction or story.	Explore a shared screening or partner story.

One audience, one stage, one message, one useful proof, one clear next step.

Brand files

Everything needed to use this guide travels with the kit.

Logo artwork	Primary SVG White SVG Black SVG Light-background SVG X icon
Guide	PDF Editable HTML
Digital tokens	CSS tokens JSON tokens

Using the distribution kit

1. Unzip the complete kit and open `index.html`.
2. Keep the `assets` folder beside the HTML.
3. Use the PDF for a fixed, portable reading copy.

The HTML works offline. Its fonts come from the reader's device, so letter shapes can vary by platform. The PDF preserves the layout and type used for this edition.

Keep the identity consistent

Use the supplied SVG logo, palette and campaign examples. Preserve original artwork and required disclosures. Match the version number when sharing files.
